Work Experience

Facebook, NY | Current
Software Engineer

Facebook, CA | 2014
Software Engineer Internship

Programming Skill

C, Obj-C, Python, JavaScript

College Coursework

Operating System Design & Impl.
Fundamentals of Programming Lang.
Algorithm Design & Analysis
Parallel & Sequential DS & Algorithms
Computer Vision
Machine Learning
User-Centered Research and Evaluation
Software Structure and User Interfaces
Interaction Design Studio
Computer Music & Signal Processing

Education

Carnegie Mellon University | 2012 - 2015
Bachelor of Science in Computer Science (CS)
Double major in Human-Computer Interaction (HCI)
Graduated with University Honors

Cumulative GPA: 3.57/4.00

Projects

Nito | 2015

My team worked for a real-world client as a part of our capstone project. We prototyped an online proctoring system that provides efficient and accurate proctoring of extensive amount of test takers at a low human cost.

Facebook iOS - Internship | 2014

Created a survey system on Facebook iOS in the news feed for advertisers to measure advertisement effectiveness.

Meet Up | 2014

Team leader, designer, and programmer in a team of four. We are creating an iOS app that helps people making appointments with others. Use Obj-C for front-end and Django for back-end.

Autosecretary | 2014

Programmer in a team of five. We created a web system to assist student organizations with daily tasks such as posting schedules, managing absences and excuses, sending email notifications, etc. The system is being used by three student organizations now in CMU. Used Django and AngularJS.

Entropy | 2013

An experimental and sophisticated personal website written in pure Javascript.
<http://andiwang.net/entropy>

Floater | 2012

A solo course project produced in three weeks. A game with some nice graphics/motion design and camera motion detection. <http://goo.gl/CzE2Am>
